The screenshot shows the GraphQL Playground interface. On the left, there is a text area for writing queries. The query is:

```
1 query TodoAppQuery($n: Int) {
2   globalTodoList {
3     items(first:$n) {
4       edges {
5         node {
6           text
7           complete
8         }
9       }
10    }
11  }
12 }
```

 Below the query is a section for query variables:

```
1 {
2   "n": 2
3 }
```

 On the right, the JSON response is displayed:

```
{
  "data": {
    "globalTodoList": {
      "items": {
        "edges": [
          {
            "node": {
              "text": "Release GraphQL",
              "complete": true
            }
          },
          {
            "node": {
              "text": "Attend @Scale 2015",
              "complete": false
            }
          }
        ]
      }
    }
  }
}
```
